Dear Expat,

On behalf of International Community I want to extend a warm welcome to all new and returning international knowledge workers and families. I hope you will have a rewarding and successful stay in Århus.

International Community is a network of public, private, educational and scientific institutions working to improve social contact, professional networking and practical assistance for international knowledge workers and families.

We are pleased to partner with Aarhus University in establishing a model knowledge network because it gets at the heart of what drives International Community - ensuring prosperity for the international families, workplaces and institutions of the Århus region.

International Community is here to support your successful stay and make you feel at home. To that end, we want to ensure that you know how to locate the wide variety of activities available to you and that you are aware of, and have easy access to, information relevant to you and your family.

During your stay in Århus, I am sure we will get to know each other. We will assist you in many ways, including facilitating building up a professional and social network, and helping you to learn your way around the city and its surroundings. You will receive invitations to a wide range of activities on a regular basis, supplemented with a weekly newsletter.

We invite you to participate and share your thoughts and reactions throughout the stages of your stay. This level of collaboration is what will help to reveal new innovations and connect participants to new ideas, partners, and resources. We look forward to participating with you in an active, dynamic exchange of ideas.

Being a member of International Community is free and you can sign up on our website www.internationalcommunity.dk. This site also informs about the services provided by International Community.

I look forward to meeting you and assisting you in the best possible way during your time in Århus.

Wishing you a wonderful stay,

Tiny Maerschalk

Project Manager
